Ekta Forest Experience

"Invest in Nature"

Discover the heart of our mission - a welcoming hub where technology meets nature's embrace. Explore our holistic approach to sustainable forestry and environmental stewardship.

Ekta Forest

Uniting Humanity with Nature

Ekta Forest is a gateway where technology and nature converge, offering a purposeful path for people to conserve our Mother Earth. Situated near the iconic Statue of Unity, this initiative is driven by a deep commitment to sustainability, organic farming, and the sacred act of tree planting. Join us as we embark on a journey to restore the harmony of our planet, one tree at a time.

What We Serve

Secure Web Portal

Ekta Forest provides a secure web portal where all the information is provided regarding the Red Sandalwood trees. For the number of trees that you choose, you will receive a certificate with a unique identity number.

Rare and High-Demand Trees

Red Sandalwood trees are high in demand and are rare. Investing in these trees can help you fetch higher returns on your principal amount after a few years.

Environmental Contribution

Above all, you as a human being are contributing to the environment by planting a tree in your name. **Ekta Forest** aims to bring you on the path of sustainability, where our team will take care of your plantations.

How We Work

Ekta Forest provides a secure web portal where all the information is provided regarding the Red Sandalwood trees. This portal serves as a hub for our customers, offering transparency and ease of access to details about their tree investments. For the number of trees that you choose, you will receive a certificate with a unique identity number, allowing you to track the progress of your contribution to environmental conservation.

Red Sandalwood trees are high in demand and are rare. These trees are highly valued for their beautiful wood and various medicinal properties. Investing in these trees through Ekta Forest can help you fetch higher returns on your principal amount after a few years, as the value of these trees continues to appreciate over time. By owning a piece of these precious resources, you are not only securing your financial future but also playing a crucial role in preserving the ecological balance of our planet.

Above all, you as a human being are contributing to the environment by planting a tree in your name. Ekta Forest aims to bring you on the path of sustainability, where our team of experts will take care of your plantations, ensuring their proper growth and thriving. By partnering with us, you are not only making a personal investment but also becoming a steward of the Earth, leaving a lasting positive impact for generations to come.

Below is the bifurcation of the amount you pay per Red Sandalwood tree

- 1 Red Sandalwood Plantation Charges
- 2 Plant Transportation
- 3 Government Trees registration
- 4 Plant support stand for 3 Years (till its stability)
- 5 Organic Fertilizer, Organic manual for 15 years
- 6 Organic manual for 15 years
- 7 Insurance
- 8 Land renting charges
- 9 Tree Shaping charges
- 10 Security charges (Protection from horses, dogs, etc)
- 11 CCTV camera operation charges
- 12 Tar fencing
- 13 Harvesting Permission from Forest Department
- 14 Agricultural Expert/Doctor Visit

Unlocking the Benefits of Tree Ownership

As a proud tree owner, you can enjoy a guaranteed 20 times more return on your investment from the company, based on the market price at that specific time. Alternatively, you have the freedom to sell the tree on your own terms.

To estimate the weight of a 15-year-old red sandalwood tree, follow these steps:

Calculate the tree's volume:

- Use the formula for the volume of a cylinder: $V = \pi r^2 h$
- The radius (r) can be determined from the circumference of the circle where $C = 2\pi r$
- and where $r = C/2\pi$
- For a 15-year-old red sandalwood tree, assume an estimated height (h) of around 10 to 12 meters.

Calculate the tree's weight:

- Multiply the tree's volume by the wood density (approximately 0.9 to 1.0 grams per cubic centimeter).
- For easier understanding, convert the weight from grams to kilograms. For example, based on an average height of 8 meters, a diameter at height (DBH) of about 17.5 centimeters, and an average wood density of 0.95 kg per liter, the approximate weight of a 15-year-old red sandalwood tree is around 182.8 kg. **(Please note that these figures are approximate and may vary due to environmental changes and other factors.)**

Your Path to Environmental Stewardship

Invest in Nature

Through our secure web portal, you can purchase Red Sandalwood trees and become a guardian of the Earth. Your investment not only contributes to reforestation but also offers the potential for financial returns.

Nurture and Grow

As the owner of your trees, you can monitor their progress and growth. Our team of experts will ensure the proper care and maintenance of your trees, providing you with regular updates and the opportunity to visit the Ekta Forest.

Witness the Impact

Your contribution to Ekta Forest goes beyond just planting a tree. You become a part of a larger movement, restoring ecosystems, establishing habitats for wildlife, and leaving a lasting positive footprint on our planet.

Our Ethos: Solidarity and Sustainability

Solidarity in Action

"EKTA," meaning unity, is the foundation of our ethos. We believe in uniting individuals to collectively work towards environmental conservation, creating a brighter future for generations to come.

Sustainable Solutions

Sustainability is not merely a goal, but a sacred agreement with the Earth. Our offerings, from organic produce to the nurturing embrace of Gir cow milk and ghee, embody our respect for the Earth's abundance.

Technological Innovation

Guided by the beacon of technological innovation, we have crafted a web portal that invites people to join us in our mission of tree planting, seamlessly connecting them to the environment.

Restoring Nature's Harmony

We firmly believe that when hearts and hands unite, the symphony of nature's harmony can be restored. Join us on this sacred journey of healing and revitalizing our Mother Earth.

Embracing the Power of Red Sandalwood

Ecological Significance

Red Sandalwood, also known as Raktachandan, is a rare and valuable tree that provides food and habitat for wildlife. Its antiseptic and anti-aging properties make it highly sought-after in the pharmaceutical and cosmetic industries. People use red sandalwood for conditions such as cancer, wounds, digestive tract problems, fluid retention.

Economic Potential

The market for Red Sandalwood is stable and lucrative, with prices steadily increasing over the past decades. Investing in these trees not only contributes to environmental conservation but also offers a promising financial opportunity.

Sustainable Practices

At Ekta Forest, we are dedicated to responsible and sustainable practices. We ensure the proper care and maintenance of each Red Sandalwood tree, from planting to maturity, to maximize their growth and ecological impact.

Investing in a Sustainable Future

Financial Security

Investing in Red Sandalwood trees not only benefits the environment but also offers a promising financial opportunity. As the demand for this rare and valuable resource continues to grow, your investment has the potential to yield substantial returns.

Environmental Impact

By purchasing Red Sandalwood trees through Ekta Forest, you are directly contributing to reforestation efforts and the restoration of natural habitats. Your investment has a tangible and lasting impact on the health of our planet.

Meaningful Gifting

Ekta Forest's tree-planting initiative offers a unique and thoughtful way to gift to your loved ones. By purchasing a tree in their name, you are not only celebrating a special occasion but also leaving a lasting legacy for the environment.

Building Community

Join a community of like-minded individuals who share a passion for environmental conservation. Together, we can create a ripple effect of positive change, inspiring others to follow in our footsteps and contribute to a sustainable future.

The Ekta Forest Advantage

Technological Innovation

Our secure web portal seamlessly connects you to the environment, making the process of tree ownership and management effortless.

Sustainable Practices

We are dedicated to responsible and eco-friendly practices, ensuring the proper care and maintenance of each Red Sandalwood tree.

Financial Opportunity

Investing in Red Sandalwood trees not only contributes to environmental conservation but also offers the potential for substantial financial returns.

Community Engagement

Join a community of like-minded individuals who share a passion for environmental stewardship and creating a sustainable future.

Nurturing Nature, Securing the Future

Environmental Preservation

By investing in Red Sandalwood trees through Ekta Forest, you are actively contributing to the preservation of biodiversity and the restoration of natural habitats.

Economic Empowerment

Our platform not only offers a secure investment opportunity but also supports the local economy by promoting sustainable practices and creating employment opportunities.

Generational Legacy

Your investment in Ekta Forest is a testament to your commitment to a sustainable future, leaving a positive impact for generations to come.

Collective Impact

When individuals come together to support initiatives like Ekta Forest, the collective impact on the environment and our planet becomes truly transformative.

Frequently Asked Questions

1. **How can I get my own tree?** Contact us at (add contact mail/number) for personalized consultation and a seamless buying process.
2. **How does tree ownership work?** When you purchase a tree, you'll receive a unique ID certificate. You can even gift a tree to someone else, and they'll receive the rights to the tree with the unique ID. You can sell the tree at any time, and the ownership will be transferred to the buyer.
3. **What makes each tree unique?** The buyer's name becomes the tree's identity. You become the proud parent of your trees, while we handle the planting and maintenance. We provide a unique identity number and location for each planted tree. In case the tree owner is no longer available, we have a nominee option for transferring ownership. You can also visit Ekta Forest near The Statue of Unity to see our plantations.
4. **What's the difference between red & white sandalwood?** Red and White Sandalwood, though from the same family, have distinct qualities. White Sandalwood is known for its aromatic fragrance and therapeutic properties, while Red Sandalwood boasts a rich red color and durability in its bark. Red Sandalwood is used to create high-end furniture, intricate carvings, and musical instruments. It's also widely used in the cosmetics industry and traditional Ayurvedic practices. At Ekta Forest, we preserve these resources and contribute to the Indian economy through safe trading practices.
5. **What are the rights and liabilities after buying a tree?** When you buy a tree, you receive a certificate and a unique number for your tree. The tree is registered in your name, and we cover insurance, so there are no liabilities for you. In case of any damage due to unfavorable weather conditions, we handle the insurance process on your behalf. However, the land where your tree is planted does not belong to you.
6. **Can I buy a tree with cash?** Unfortunately, we only accept online payments, so cash purchases are not available.
7. **Is the price too high?** Red Sandalwood is an endangered plant. Due to habitat loss and over-harvesting, the red bark has become rare, leading to a high demand and limited supply, which affects the price.
8. **How will my investment return profit?** Sandalwood is a market with consistent growth. After a few years, if you sell the tree to a buyer, you'll receive higher returns than your initial investment. The demand for Sandalwood trees is high, and the supply is limited, which will drive up prices in the future. After 15 years, the market demand and prices will be even higher. We also offer options for Ekta Forest to buy back the tree after 15 years or for you to sell it to someone else.
9. **Can I verify my tree?** Yes, at Ekta Forest, we name the trees after their owners. You can visit us near The Statue of Unity to see the plantations. We provide a unique identity number and name tags to help you locate your tree. After your purchase, you'll receive physical and online certificates as well.
10. **Is it a safe investment?** Yes, your investment will appreciate as Sandalwood is a rare tree. Its demand is increasing, and you'll receive higher returns in a few years. At Ekta Forest, we prioritize our users' interests and build trust by providing genuine services.
11. **Is it legal?** Yes, Ekta Forest is a secure tree trading platform. We create a safe environment for users to buy and sell trees.
12. **What is the buyback policy?** While we don't have a specific buyback policy, if you decide not to keep the tree anymore, we'll buy it back from you based on its market price at that time.

Join the Ekta Forest Movement

Invest in Nature. Become a guardian of the Earth by purchasing Red Sandalwood trees through our secure web portal. Your investment will contribute to reforestation efforts and offer the potential for financial returns.

Experience the Difference. Visit the Ekta Forest near the Statue of Unity to witness the ongoing plantation efforts and connect with the land. Immerse yourself in the rhythm of rural life and forge a deeper bond with nature.

Join the Movement. Be a part of the Ekta Forest community, where individuals come together to create a sustainable future. Your contribution, no matter how small, can make a significant impact on the health of our planet.
